

REMARKS

An Examiner's Amendment was made in the present case. However, two amendments were not authorized by the undersigned. The unauthorized amendments were those made to line 11 of claim 1 and line 11 of claim 6. The original language "the asynchronous interface indicates an instant transmission of the said data frame by each" was correct. The language "the said data frame" refers to "one of the data frames" recited in line 10 of each of claims 1 and 6.

Therefore, the amendments made herein are to change the language back to the original form.

These amendments do not change the scope of the claims, but rather merely affect the form. Therefore, substantive examination is not required. These amendments were not made earlier because they were made in response to the Examiner's Amendment.

The Commissioner is authorized to charge any additional fees and/or credit any overpayment to Deposit Account No. 20-1504 (MTR.0092US).

Respectfully submitted,

Date: _____
